RS Studio

RS Studio stands for Radish Squad Studio and consist of 3 graphic design and 1. One day the four of us desided to form a studio together where all our skills would work. Thats when we came up with ideas for small games/apps.

Team

Diana Salas

Hello! I'm a woman of few words, however if there is an idea to be said, you can be sure it shall be spoken! I've been doodling away ever since I was a child, so art is a huge deal for me. I enjoy reading mostly graphic novels and playing video games in my free time. Music and tea are my main sources of fuel for my creativity.

Janet Mendez

Hello world! I am a budding web programmer who likes to learn how to make things work. I have been coding since I learned HTML and CSS in media class and since then liked making websites, games, and animatronics. Other than programming I like to drink much tea, eat pastries and watch anime.

Richard Cho

Hi! I'm a graphic design who likes to illustrate. I recently found a interest in designing patterens and love the freedom. I enjoy eating ramen and playing pc based games.

Jun Min Lu

Hey! I go by the name Minny and I'm really shy. I love to do traditional illustrations but I'm trying to learn how to do digital. I would love to draw on my free time, if I had any. Aside from drawing I love to eat, especially ramen and fries, I also like to game but havent had the time to anymore.
